

w16-p1: finish displaySingleDrink_xx.js

The screenshot shows the final state of the 'displaySingleDrink_xx.js' file in VS Code. The file is located in the 'src' directory of the 'cocktaildb_210410139' project. The code defines an asynchronous function 'displaySingleDrink' that takes an array of drinks and displays the first one. It uses 'console.log' for debugging and 'hideloading()' to hide a loading spinner. The function also sets the 'src' of an image and the 'textContent' of the drink's name and description. The browser window shows the 'Single Cocktail' page with the details of a drink, including its name, description, and ingredients. The console shows the output of the 'displaySingleDrink' function.

w16-p2: finish addItems for Grocery demo

The screenshot shows the final state of the 'addItems' function in the 'grocery_210410139' project. The function is located in the 'app_210410139.js' file. It takes an input string and adds it to a list of grocery items. The function uses 'document.querySelector' to find the input field and 'document.querySelector' to find the list container. It also uses 'document.querySelector' to find the 'add' button. The browser window shows the 'Grocery Bud' application with a list of items: 'mamawawa', 'Apple', and 'Mamawawa'. The console shows the output of the 'addItems' function.
